

Choose a project you've created over the last year to rework for addition to your professional design portfolio. Before beginning work, identify three areas of improvement (I.E. craft, concept, typography, additional assets, etc...) that need to be addressed to make this project interview ready. Craft, follow-through and ability to discuss in detail (for interviews) will be emphasized upon project completion.

Schedule (subject to change)

...Cont. from previous schedule, updated 02/06/18
